

SUMMARY

GenAI Engineer with 6+ months of industry experience at E42.ai, specializing in RAG systems, LangChain/LangGraph-based agents, and NLP pipelines. Proven impact in production systems with measurable gains in accuracy, latency, and automation efficiency. Seeking research-oriented or applied AI roles.

SKILLS

GenAI: LLMs, RAG, Langchain, HuggingFace, LangGraph, CrewAI, n8n

ML/DL: Pandas, Numpy, Scikit-Learn, PyTorch, TensorFlow, Keras, NLP, CV

Backend: FastAPI, Flask, Django REST

Data: SQL, MongoDB, Vector DBs

Programming Languages: Python, Java

Development & Version Control: Git, Docker

EXPERIENCE

Trainee Engineer, E42.ai (Light Information Systems), Pune, India

Sept 2024 – Mar 2025

- **Boosted chatbot accuracy from 20% to 95%** by rigorously evaluating model responses, performing error analysis, for Arabic and RTL languages by fine-tuning NLP pipelines, optimizing tokenization, and enhancing intent classification.
- **Pioneered a CNN-based skin analyzer** for an Oracle partner, leveraging image inputs to detect skin type and conditions in real-time with 95% accuracy, enabling personalized product recommendations by implementing strict data validation and quality control protocols.
- **Reduced semantic search time by 35%** by optimizing embedding generation and vector storage for NLP pipelines.
- **Implemented a robust automation system utilizing Python** to extract and structure data from unorganized PDF files, resulting in over 1,000 records processed weekly, which improved data accuracy and accessibility for the team.
- **Designed a modular ReactJS component integrated with Google Drive API**, enabling real-time file uploads and folder content synchronization, reducing manual data entry errors by 15%.
- **Integrated SharePoint POC using Django REST Framework**, automating backend processes and securing document access for 50 internal users, improving team efficiency by 20%.

PROJECTS

Agentic AI Root Cause Analysis System

Live Demo

TECH STACK: Python, LangGraph, LangChain, FAISS, Groq LLM, RAG, Embedding Models, Streamlit

- Built an agentic AI system to perform automated root cause analysis on equipment failures using LangGraph-based multi-agent orchestration. Implemented RAG with FAISS to retrieve SOP documents and enable LLM-driven reasoning for faster diagnostic insights.

Multilingual Transliteration NLP

Live Demo

TECH STACK: Python, Transformers, HuggingFace, PyTorch, CTranslate2, NLP, Colab

- Developed a multilingual transliteration model to convert text across multiple Indic languages using transformer-based architectures. Optimized inference performance with CTranslate2 and deployed an interactive demo on Hugging Face Spaces for real-time transliteration.

Multi-Actor RAG Chatbot using LangGraph

GitHub

TECH STACK: Python, LangGraph, LangChain, AstraDB, RAG, Embedding Models, Colab, LLMs

- Built a multi-agent RAG system using LangGraph and LangChain to coordinate document ingestion, semantic search, and question answering. Leveraged AstraDB as a scalable vector store, enabling efficient context retrieval and collaboration between autonomous agents for high-accuracy responses.

EDUCATION

CDAC, ACTS, Pune, India

Mar 2024 – Aug 2024

Postgraduate Diploma in Artificial Intelligence - **Percent - 82**

Relevant Coursework: Python, Java, Data Analytics, Machine Learning, Deep Learning, NLP & CV, DevOps, PySpark, Kafka

Vishwakarma Institute of Technology, Pune University, Pune, India

Aug 2019–May 2023

Bachelor of Technology in Instrumentation & Control - **CGPA - 8.34 / 10**

Relevant Coursework: Data Structures, Web Technology, Project Management, Data Science, Computer Networks & Maths.

ACHIEVEMENTS AND HACKATHONS

- Spearheaded the development of **NewsTracker** during the Pebblo DAXA Hackathon, CDAC-ACTS, July 2024—an open-source news summarization system that improved data processing speeds by 15x using Pebblo's SafeLoader and Retriever.
- Achieved Rank 31 in C-CAT Entrance Examination for CDAC

EXTRACURRICULAR & HOBBIES

- Music, DSA, Playing Instruments, Sports and Cinema
