SUMMARY

Driven AI Engineer skilled in machine learning, data analytics, computer vision and natural language processing. A problem solver, and team player proficient in Python, PyTorch, SQL, and PowerBI, seeking roles in the field of Data Science.

EDUCATION

CDAC, ACTS, Pune, India

Mar 2024 – Aug 2024

Postgraduate Diploma in Artificial Intelligence - **Percent - 82**

Relevant Coursework: Python, Java, Data Analytics, Machine Learning, Deep Learning, NLP & CV, DevOps, PySpark, Kafka

Vishwakarma Institute of Technology, Pune University, Pune, India

Aug 2019–May 2023

Bachelor of Technology in Instrumentation & Control - **CGPA - 8.34 / 10**

Relevant Coursework: Data Structures, Web Technology, Project Management, Data Science, Computer Networks & Maths.

EXPERIENCE

Trainee Engineer, E42.ai (Light Information Systems), Pune, India

Sept 2024 – Mar 2025

- Improved the accuracy of a multilingual chatbot for Arabic and other RTL languages from 20% to 86%, enhancing user interaction and NLP performance.
- Developed a Skin Analyzer model from scratch to detect skin types and diseases, recommending suitable products based on captured images, leveraging computer vision techniques.
- Optimized embeddings during data saving to the corpus, improving semantic search efficiency in NLP applications.
- Designed and deployed a PDF data extraction agent, automating information retrieval for enhanced productivity.
- Integrated Google Drive with ReactJS, enabling file uploads from the UI and implemented a refresh list API to dynamically display Drive contents on the interface.
- Added SharePoint integration to the Django backend, utilizing uploaded files as input for document extraction via an automated extractor.

PROJECTS

[Clip Master: Automated Highlights using AI](#) 🚩 | Whisper, BART, Streamlit

July 2024 – Aug 2024

- Developed a Streamlit app for video-to-text transcription and summarization using Whisper and BART models.
- Automated audio extraction with yt-dlp and FFmpeg, supporting both YouTube URLs and local video files.
- Enhanced productivity by automating text chunking, summarization, and key insights extraction, utilizing NLP techniques and Python libraries.

[NewsTracker: News Summarizer with Q&A Bot](#) 🚩 | BERT, Ollama3, RAG, Flask

Jun 2024 – July 2024

- A Flask web application designed to streamline news consumption by offering concise article summaries and precise answers to user queries, using Langchain and Vanilla RAG architecture.
- Ollama3 is used for conversational and generative tasks, while BERT is utilized for precise answer extraction from structured input data.

[Real-Time Face Filters](#) 🚩 | OpenCV, Haarcascade Classifier

Jan 2023 – May 2023

- Real-time face filter application uses OpenCV, allowing users to apply virtual hats, glasses, and dog ears to their faces in a live video feed.
- Integrated Haar Cascade classifiers for accurate face detection and precise overlay of filters on facial features.
- Utilized advanced image processing techniques like resizing and alpha blending for seamless filter integration.

SKILLS

Skills: AI & ML, Data Analytics, GenAI, Deep Learning, NLP & CV, Project Management, Communication Skills.

Languages: Linux, Python, Java, C, C++, JavaScript, SQL.

Developer Tools: VS Code, Jupyter Notebook, PowerBI, Tableau, Excel, API.

Libraries/Frameworks: Scikit-Learn, Tensorflow, Pytorch, Numpy, Pandas, GitHub, Docker, Git

ACHIEVEMENTS AND HACKATHONS

- First Place, Pebblo DAXA Hackathon, CDAC-ACTS, July 24, Contributed to Open Source
- Achieved Rank 31 in C-CAT Entrance Examination for CDAC

EXTRACURRICULAR & HOBBIES

- Music, Playing Instruments, Sports and Cinema
