

Kunal Satish Kurve

Pune, Maharashtra, India | +91-7030884560 | masterkunal095@gmail.com | <https://www.linkedin.com/in/kunal-kurve-robolover>

TECHNICAL SKILLS

- **Programming Languages:** Python, Java, SQL
- **Machine Learning:** Pandas, Numpy, Scikit-Learn, PyTorch, TensorFlow, Keras, NLTK, Transformers, Spacy, OpenCV.
- **Development & Version Control:** Git, MLflow, and Docker, MongoDB
- **Generative AI:** LLMs, RAG, Langchain, Gemini, OpenAI, HuggingFace.
- **Web Development:** HTML, CSS, FastAPI, Streamlit, Flask.
- **Cloud:** AWS - EC2
- **Data Visualization & Microsoft Tools:** Seaborn, Matplotlib, PowerBI, Tableau, Excel, PowerPoint, Word.

WORK EXPERIENCE

E42.ai (Light Information Systems)

(Sept. 2024 - Mar 2025)

Trainee Engineer

- **Boosted chatbot accuracy from 20% to 95%** for Arabic and RTL languages by fine-tuning NLP pipelines, optimizing tokenization, and enhancing intent classification.
- **Engineered a CNN-based Skin Analyzer** for an Oracle partner, enabling real-time skin type and condition detection with personalized product recommendations from image inputs.
- **Reduced semantic search time by 35%** by optimizing embedding generation and vector storage for NLP pipelines.
- **Automated PDF data extraction** using Python to convert unstructured documents into structured formats, improving internal workflow productivity.
- **Integrated Google Drive API with ReactJS**, enabling real-time file uploads and folder content sync for document management systems.
- **Built a SharePoint POC using Django**, streamlining backend automation and secure enterprise document access.

PROJECTS

ClipMaster: Automated Highlights using AI

([Repo Link](#))

TECH STACK: Python, Langchain, BART, OpenAI Whisper, Streamlit

- Developed an AI-powered application to auto-generate video highlights using Whisper for transcription and BART for abstractive summarization. Leveraged Streamlit for UI, achieving an 80% improvement in content accessibility for users with time constraints.

NewsTracker: News Summarizer with Q&A Bot

([Repo link](#))

TECH STACK: Python, Retrieval Augmented Generation, BERT, Flask, Ollama3, Github

- Built a Retrieval-Augmented Generation (RAG) system using LangChain and Ollama for generating concise news summaries from URLs and PDFs. Integrated Pebblo SafeLoader for secure ingestion and enhanced data privacy, with performance improvements of 30% in inference latency.

Real-Time Face Filter

([Repo link](#))

TECH STACK: Python, OpenCV, Machine Learning, Haar Cascade Classifier

- Engineered real-time Snapchat-style face filters using OpenCV's Haar Cascade and Dlib face landmark detection. Achieved low-latency video processing with optimized frame capture pipeline.

ACHIEVEMENTS

- 🏆 **Winner – Pebblo DAXA Hackathon**, CDAC-ACTS, July 2024
Led a 4-member team to develop an open-source data ingestion pipeline that improved processing speed by 15x using Pebblo's SafeLoader and Retriever with LangChain.
- Achieved Rank 31 in C-CAT Entrance Examination for CDAC.
- 📄 **Presented research on “Wireless Energy Transmission”** at the IEEE Research Paper Presentation Competition, demonstrating innovative solutions in energy transfer technology.

CERTIFICATIONS

- **Udemy** : Machine Learning with Python.
- **Udemy** : Pytorch for Deep Learning.
- **Udemy** : TensorFlow2 and Keras for Deep Learning.
- **HackerRank** : Python
- **NPTEL** : Database Management System
- **Udemy** : Computer vision using OpenCV, YOLO

EDUCATION

- **CDAC, ACTS, Pune, India** (Mar 2024 - Aug 2024)
PostGraduate Diploma in Artificial Intelligence (Percentage 82%)
Relevant Coursework: Python, Java, Data Analytics, Machine Learning, Deep Learning, NLP & CV, DevOps, PySpark, Kafka
- **Vishwakarma Institute of Technology, Pune, India** (Aug 2019 - May 2023)
Bachelor of Technology in Instrumentation and Control Engineering (CGPA 8.34)
Relevant Coursework: Data Structures, Web Technology, Project Management, Data Science, Computer Networks & Maths

EXTRACURRICULAR & HOBBIES

- Music, Playing Instruments, Sports and Cinema
